Profile

I am currently pursuing a Bachelor in Information Management (BIM) at St. Xavier's College, Nepal. I have a foundational understanding of JavaScript and ReactJS, along with practical experience working with the MERN stack. I am looking for an internship opportunity in ReactJS frontend development to further enhance my skills, gain hands-on experience, and contribute to a collaborative team environment.

Education

2020 – present Nepal	**BIM(Bachelor in Information Management)** *St.Xavier's College*
2017 – 2019	**+2 in Science** *CCRC(Capital College & Research Center)*

Skills

- Programming Languages: JavaScript, HTML, CSS

- Web Development: React

- API Integration

- Version Control (Git)

- Soft Skills: Report writing, Teamwork, Problem-solving

Projects

School Admission and Enrollment System

Summer Project

- Developed a basic web application to manage school admission processes as an individual project.

- Designed front-end functionalities using HTML, CSS, and JavaScript to ensure seamless user interaction.

- Created and maintained a MongoDB database for efficient storage and retrieval of admission records.

- Integrated RESTful APIs with Node.js to connect the front-end and back-end components.

- Completed the project successfully, demonstrating the ability to manage both front-end and back-end development.
